

My GSOC Experience with Swift

Priyambada Roul

About Me

- Started coding since 1st year of my college
- Currently SDE2 at Cashfree Payments
- Active in Open Source
- Bharatnatyam Dancer and Mandala Artist

Career Break and Open Source

- Took a career break from Feb - July 2025
- Explored new opportunities
- Invested time in learning something new
- Explored OSS
- Tried my hands on GSOC Projects

GSOC Organizations

- Explored GSOC Previous Organizations
- Contributed to Checkstyle and Swift
- Interacted with the Community

Selecting Swift

- Chose Swift to try something new
- Contributed to Swiftly, Swift Doc Renderer, Swift VSCode extension
- Submitted proposals to both checkstyle and swift

And I was selected by Swift!

- I was very happy 😁
- I was to integrate Swiftly with Swift VSCode Extension
- Worked on Swiftly to add JSON output
- Worked on VSCode Extension to integrate with Swiftly for toolchain management

What I Built During GSoC

- Refactoring Swiftly CLI
- Listing, Installing, Selecting Toolchains
- Progress Reporting
- Installation Progress to the User
- Working with Extension in VSCode

Learning Curve & Challenges

- New language (Swift)
- Multi-repository development
- Key learning
- Programming concepts transfer across languages.

Takeaways from GSoC

What GSoC taught me

Open source is collaborative

Mentorship accelerates learning

Learning new tech is easier than we think
